Titanium Tantalum Products Limited

Estd. In 1981

ISO 9001 - 2008 Certified

U, U2 & R Stamp Approved

ACID REGENERATION PLANT ACCESSORIES

Ti Gr 7 VENTURY

Pickling is the final treatment of iron and steel products before onward sale.

Two acids commonly used for pickling are hydrochloric acid and sulphuric acid. Waste waters from pickling include acidic rinse waters together with waste acid.

Acid regeneration plants, regenerates more than 99% of acids from highly acidic ferrous salts.
